INTENDED USE / APPLICATION

Product designed for use in households and for other similar general applications.

MOUNTING

Technical changes reserved. Read the manual before mounting. Mounting should be performed by an appropriately qualified person. Any activities to be done with disconnected power supply. Exercise particular caution. The product has a protective contact/terminal. Failure to connect the protective lead may lead to electric shock. Mounting diagram: see pictures block [A]. Check for proper mechanical fastening and connection to electrical power before first use. The product can be connected to a supply network that meets energy quality standards as prescribed by law. Use appropriate diameters of the power leads. To maintain the proper IP protection level, the right diameter of the power cable should be selected for the cable gland used in the product.

FUNCTIONAL CHARACTERISTICS

The product can be used either indoors or outdoors.

USAGE GUIDELINES / MAINTENANCE

Any maintenance work must be done when the product is disconnected from the power supply. Do not cover the product. The product may heat up to a higher temperature. The light source becomes heated to a high temperature. Replacement of light source to be performed after the product cools down: see pictures. It's forbidden to use the product with a damaged protective cover. The construction of the product offers no resistance to specific conditions, e.g. due to the presence of defrosting substances and salt atmosphere.

EXPLANATIONS OF SYMBOLS USED

P1: Rated voltage, frequency.

P2: Maximum power of the light source.

P3: Base/holder.

P4: Product meets the requirements of EU directives.

P5: Protection against solid foreign objects bigger than 1,0 mm provided.

P6: Protection against splashing water provided.

P7: Class I. A product in which protection against electric shock is provided not only using basic insulation but also through additional safety measures, i.e. extra protective circuit to which a protective conductor of the fixed feeding installation needs to be connected.

P8: The product can be used either indoors or outdoors.

P9: The symbol describes the minimal distance of a light fixture (its light source) from the spots and objects that it's illuminating.

P10: A light fixture in which self-shielded halogen light bulbs can be used. See: the same symbol should be applied to a light bulb.

P11: The chipped globe, screen, or protective shield must be replaced immediately.

P12: Certificate of Conformity confirming the quality of production following approved standards on the territory of the Customs Union.

P13: Environmental operating temperature range that the product can be exposed to.

ENVIRONMENTAL PROTECTION

Keep your environment clean. Segregation of post-packaging waste is recommended.

P14: This labeling indicates the requirement to selectively collect waste electronic and electrical equipment. Products labeled in this way must not be disposed of in the same way as other waste under the threat of a fine. These products may be harmful to the natural environment and health, and require a special form of recycling/neutralizing. Information on collection centers is provided by local authorities or sellers of such goods. Used items can also be returned to the seller when a new product is purchased, in quantity no larger than the purchased item of the same type. The above rules regard the EU area. In the case of other countries, regulations in force in a given country must be applied. Contacting the distributor of our products in a given area is recommended.

COMMENTS/GUIDELINES

Failure to follow these instructions may result in e.g. fire, burns, electrical shock, physical injury, and other material and non-material damage. For more information about Kanlux products visit www.kanlux.com

Kanlux SA shall not be responsible for any damage resulting from the failure to follow these instructions. Kanlux SA reserves the right to make changes in the manual - the current version can be downloaded at www.kanlux.com.
